## SIDEKICK 3-STAGE STRAW WATER FILTER

### Sidekick 3-Stage Straw Water Filter

### FEATURES

- ✓ Ultra-portable and light-weight
- ✓ 3-Stage filtration
- ✓ Removes up to 99.9999% of bacteria
- ✓ Removes 99.9% of protozoa
- ✓ Removes chemicals and heavy metals
- ✓ BPA-free

### HOW TO USE

1. Remove filter cap and open filter inlet.
2. Dip filter into water source and suck water through the filter.
3. If water becomes hard to draw through the filter, try the following.
  - Leave the filter in water for a few minutes before use.
  - Remove the pre-filter and blow backwards through the filter.
  - Replace pre-filter if necessary.

### SPECIFICATIONS

- Filter Pore Size: 0.1 micron
- Filter Capacity: 50 gallons per Activated Carbon Filter
- Flow Rate: Up to 250ml/min
- Removes up to 99.9999% of bacteria

Weight: > 1 oz.

Size: .7" wide x 6" tall

Working Temperature: 39 - 122°F

### IDEAL USES

Travel, Camping, Hiking, Adventures, Emergency Relief, Emergency Kit (72 hour kit), Scouting and more.

### NOTES

1. For long term storage, rinse with clean water and let the filter air dry. Close both end caps and store in a cool and dry location.
2. DO NOT use in sea water.
3. Working temperature is 39 - 122°F. DO NOT filter water above 122°F as it could damage the filter membrane. DO NOT let water freeze inside the filter as it could damage the filter membrane.

EPA Est No.94660-CHN-1
